

ICT26 Web Development

Tutorial 1b HTML Tables, Forms and Web Media

Overview

This week's lab exercises:

- Upload the html to free hosting website. Understand HTML Tables and Forms
- Understand Forms
- Apply styles on Tables
- Be able to understand use different types of inputs in forms.
- Apply styles to forms, tables and web media

Guidelines

Start by putting everything into a folder named "ict726_tutorial2".

Note: Since absolute links will only work on your computer, we recommend checking your website to make sure all the links work and use the same structure on your home computer.

Tables

Tag	Description
<code><table></table></code>	Creates a table
<code><tr></tr></code>	Sets each row in table
<code><td></td></code>	Sets each column in row

Exercise 1:

Create the following table using <table> tag. Put some meaningful text in each row. Make sure that your table has “100%” width and “collapse” border. The table header background colour should be “#1c87c9” and text colour should be white. Adjust the table text to the centre. Your table should look like the following diagram.

Heading	Heading
Some text	Some text
Some text	Some text
Some text	Some text
Some text	Some text

Exercise 2:

Create the following tables using “colspan” and “rowspan” tag. Your border should be “1px” wide, solid and black. The header should span 2 columns and row having “February” should also span two rows.

Month and Date	
January	10.01.2020
February	10.02.2020
	11.02.2020

Exercise 3:

Create a simple form using html with name, email, address and postcode field. Make sure to use <textarea> element for the address field.

Name:

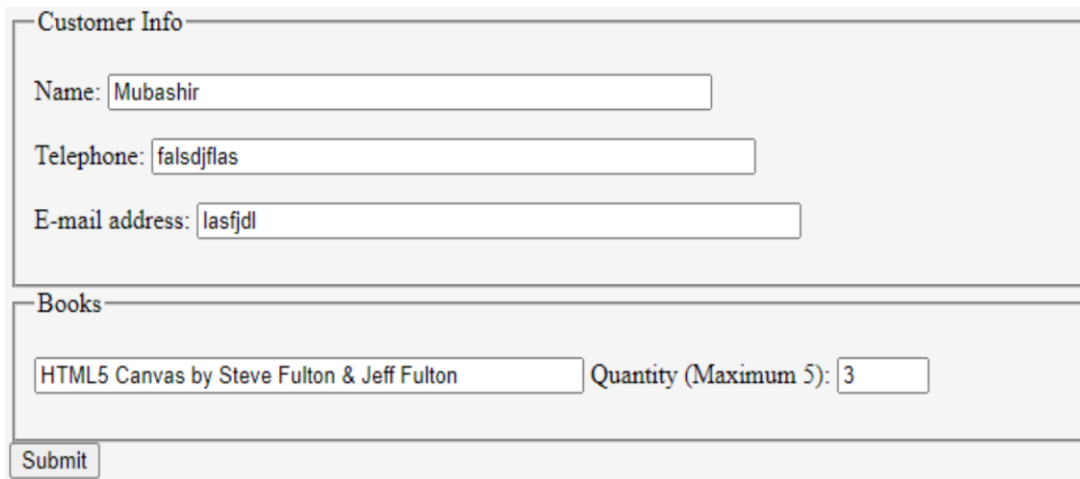

Email:

Address:

Postcode:

Exercise 4:

Create a customer information form. Use the appropriate input types and fields to create the form. Use “type” attribute properly. The email and name field size is 50 characters. For telephone field make sure that user can enter a specified pattern and it should be verified. The book field should contain the different book options and the maximum number can enter in the quantity field is “5”. Your form should look like the following.

The screenshot shows a web form with two main sections. The first section, titled "Customer Info", contains three input fields: "Name:" with the value "Mubashir", "Telephone:" with the value "falsdjflas", and "E-mail address:" with the value "lasfjdl". The second section, titled "Books", contains a dropdown menu with the selected option "HTML5 Canvas by Steve Fulton & Jeff Fulton" and a quantity input field labeled "Quantity (Maximum 5):" with the value "3". A "Submit" button is located at the bottom left of the form.

Exercise 5:

Create a video gallery page and add “**Why Study IT at KOI**” and “**KOI Testimonial**” videos from resource folder. Also add one audio file from the resource folder. Make sure that you first video will start with auto play and the controls are visible on all videos.

Exercise 6:

Read the article on “Creating Accessible Webpages” provided on the following link

<https://microsoft.github.io/Web-Dev-For-Beginners/#/1-getting-started-lessons/3-accessibility/README?id=creating-accessible-webpages>

Write down the main point of good display principles, discuss how ARIA would be helpful and how images can be made more accessible.

Case Study Question:

Alex, a dedicated web developer, wishes to improve the structure and semantics of his portfolio website. As a student of web development course, your task is to write the semantically correct HTML structure for Alex's portfolio. The primary goal is to ensure that Alex's portfolio showcases his skills, projects, blog, and contact information in a well-organized and accessible manner. The portfolio has the following sections

Header Section

- Content: Name and professional title
- Navigation Bar: Links to sections (About, Projects, Blog, Media, Contact).

About Section

- Content: Introduction about Alex, skills, passion and image.

Project Section

- Display projects with titles, image and descriptions.
- Add at least three projects using <details> tag.

Skill Section

- List of skills and proficiency using <table> tag.

Blog Section

- Blog posts with titles and content.

Media Section

- Embedded one video and audio.

Footer

- Copyright and profession information

~~~~~ END ~~~~~
